

# Climber Cards

---

Download Climber Cards v1.5.0

## Most recent update 1.5.0 - 2019-02-21

---

### Fixed

- Wait for images to load when printing
- Perfect scrollbar sometimes renders on the left side
- Cloak values with ng-bind instead of {{}}

Full CHANGELOG can be found end of this file.

Table extension with cards as cells, developed for showcasing items with images.  
Responsive design and selection enabled, both click and swipes. Multiple layout options  
and Select and Go To Sheet mode

***Tested from Qlik Sense June 2017 (in the initial release of June 2017, extensions load slow. It's fixed in patch 1 )***

# Installation

1. Download the latest version
2. Qlik Sense Desktop
  - To install, copy all files in the .zip file to folder  
"C:\Users[%Username%]\Documents\Qlik\Sense\Extensions\Cards"
3. Qlik Sense Server
  - See instructions [how to import an extension on Qlik Sense Server](http://help.qlik.com/en-US/sense/Subsystems/ManagementConsole/Content/import-extensions.htm)  
(<http://help.qlik.com/en-US/sense/Subsystems/ManagementConsole/Content/import-extensions.htm>)

# Configuration

---

- 1st dimension is the unique identifier that will be selected if a card is selected. The identifier won't show up on the card.
- 2nd dimension is the image and needs a url for source.
  - Example url string: 'http://ia.media-imdb.com/images/M/MV5BMjEyMjc5NDI4MF5BMl5BanBnXkFtZTcwMDA5Mzg3OA@@.V1\_UX34\_CR0,0,34,50\_AL.jpg'
  - Example reference an image from Qlik Sense default repository: './content/Default/Qlik\_default\_flower.png'
- 3rd dimension is the title of the card.
- 4th dimension is optional and will show up under the title.

# Selection modes

---

It is possible to use selections to go to another sheet.

When "Select and goto sheet" is enabled, swipe selections are disabled. (I.e. it is only possible to select one row in the table.) If one value is already selected it will be deselected and no goto sheet action taken.

Image Size Mode

Contain ▼

---

## Layout mode options

- Small
- Medium
- Large

## Image mode options

- Portrait
- Landscape
- Square

## Image Size mode options

- Contain - Scale to the largest size such that both its width and its height can fit inside the content area
- Cover - Scale to be as large as possible so that the background area is completely covered by the background image. Some parts of the background image may not be in view within the background positioning area.

- Fill - Scale to fill the space. This may significantly distort the image.

Sample app can be found here under the project folders \sample app\Climber Cards.qvf.

## Known Issues and Limitations

---

The extension is intended for top lists and dashboard. Because of that we have not included support for very large tables. The limit is currently 10' cells.

## Recommended Versions

---

Qlik Sense Version	Recommended
February 2019	1.5.0
November 2018	1.5.0
September 2018	1.5.0
June 2018	1.5.0
April 2018	1.5.0
February 2018	1.5.0
